# Certified Aging Services Professional (CASP)

*A program of CLAS that leads to national professional certification.*

## CASP Certification

### The Curriculum

The CASP curriculum is a must for beginning to mid-level aging services professionals throughout the continuum of care. It offers a unique, comprehensive approach that provides practitioners with the core knowledge and holistic perspectives required to deliver housing, supportive and community services responsive to the needs of older people. You will learn to manage the total residential environment through a 45 hour intensive educational session that immerses you in all pertinent aspects of aging services management.

### On-Site or Self-Study Courses

CASP consists of three 15-hour core courses that may be taken in either an on-site or self-study format. The on-site courses feature instruction from experienced faculty and opportunities for problem-solving and networking with your peers. The self-study format offers you the flexibility to work at your own pace in your home or office and saves you the expense of travel.

## COLLABORATE

with a national network of aging services professionals

## LEARN

by participating in state-of-the-art education taught by national experts

## GROW

by enhancing recognition of your professional qualifications,  
commitment, and leadership
