ZDoctor Report of SIRSI Indexing Policies Interoperability Testing, Phase 1 Testing

1. Introduction

The ZDoctor perl program, which is proprietary software provided by Sirsi provides a way to verify the indexing policies established on the Unicorn online catalog reference implementation. ZDoctor produces a report that identifies the MARC fields and subfields that are indexed to support various Z39.50 Bib-1 Use Attributes.

For Phase 1 interoperability testings, four Bath Profile searches will be used:

- Title Search – Keyword
- Author Search – Keyword
- Subject Search – Keyword
- Any Search – Keyword.

The indexing policies to support these searches were established according to the Z-Interop document, **Indexing Guidelines to Support Z39.50 Profile Searches**.

The rest of this document presents the output of the ZDoctor program.

2. ZDoctor Report Details

The keyword searches being tested in Phase 1 interoperability testing are associated with a Bib-1 Use Attributes. The following shows that association:

- Use Attribute 4: Title Search – Keyword
- Use Attribute 21: Subject Search – Keyword
- Use Attribute 1003: Author Search – Keyword
- Use Attribute 1016: Any Search – Keyword.

For each of these, the following details show the MARC fields and subfields that are indexed in Unicorn. When creating indexing policies in Unicorn, one must set the MARC fields and subfields for each format type, and so the reports that follow show the fields and subfields indexed for the associated formats of:

- MARC (i.e. books)
- MANUSCRIPT (i.e., manuscripts)
- SERIAL (i.e., serials)
- VM (i.e., visual materials)
- MAP (i.e., maps)
- MUSIC (i.e., music)
- MRDF (i.e., computer files)
- JUNK (i.e., Non-assigned format, created to index records where no format was listed)

2.1 Use Attribute 4, Title

UNICORN Index Designation: BATH4, Bath Title Keyword Search (AL01)

2.1.2 Books

MARC 100 Personal Author

2.4 Use Attribute 1016, Any

UNICORN Index Designation: BATHANY, Bath Any Search, Use 1016, Synonym List

Unicorn uses a “synonym list” to create the index for the Any search. A synonym list uses the existing index policies for other indexes to prescribe the MARC fields and subfields to support searching. In this case, the synonym list for the Any search uses the following index policies:

- BATH4: Bath Title Keyword Search (AL01)
- BATH1003: BATH Author Keyword Search (AL03)
- BATH21: BATH Subject Keyword Index (AL04)

Those index policies are listed in sections 2.1, 2.1, and 2.3 above.
